SUCCESS

Hybrid Support

With schools delaying, creating hybrid models and going to virtual learning, we want to offer support in these unprecedented times. The SUCCESS Hybrid Support program is designed to assist with self-guided virtual instruction on days when students may not be in school. It will also allow children and families to create a circle of friends with whom they can talk, play and be physically active. As parents ourselves, we know this is an incredibly difficult time for both parents and children and see the social, emotional, and physical toll the pandemic is taking. We want to foster a positive environment committed to a child's whole well-being, including social interaction with peers, facilitation time for virtual learning, and organized activities.

It is our goal to SUCCESSfully

support your student in the following areas:

- Virtual learning and hybrid model approaches to instruction
- Socialization and interaction with others of the same age group
- Health and well-being through physical activities, including gymnastics instruction
- Creativity with crafts and games

How to achieve SUCCESS:

- Wear a mask when not engaged in physical activity
- Bring your own portable learning device (with power cord), headphones, and school materials
- Wear comfortable clothing without zippers or snaps (no pajamas)
- Pack a healthy lunch and bring a water bottle

This service will be provided as long as schools are in a hybrid model where students are in need of support during the school day.
